

DATASHEET ISAhub

The ISAhub is an innovative Internet of Things product that monitors gas, heating oil, electricity, comfort and safety of households, in real time.

Value proposition

- Customer engagement
- Zero communication costs
- Customer retention
- Faster deployment
- Smart logistics

Multiple applications

- LPG tank level monitoring
- Heating oil level monitoring
- Automatic meter Reading
- Home Security
- Home Safety

Certification

SPECIFICATIONS

Dimensions: 10 x 10 x 2,8 cm

Power: Ext. 5V power

CPU: ARM9-454 MHz

RAM: 128/256 (MB)

Flash: 256/512 (MB) with possibility of memory expansion (SD CARD)

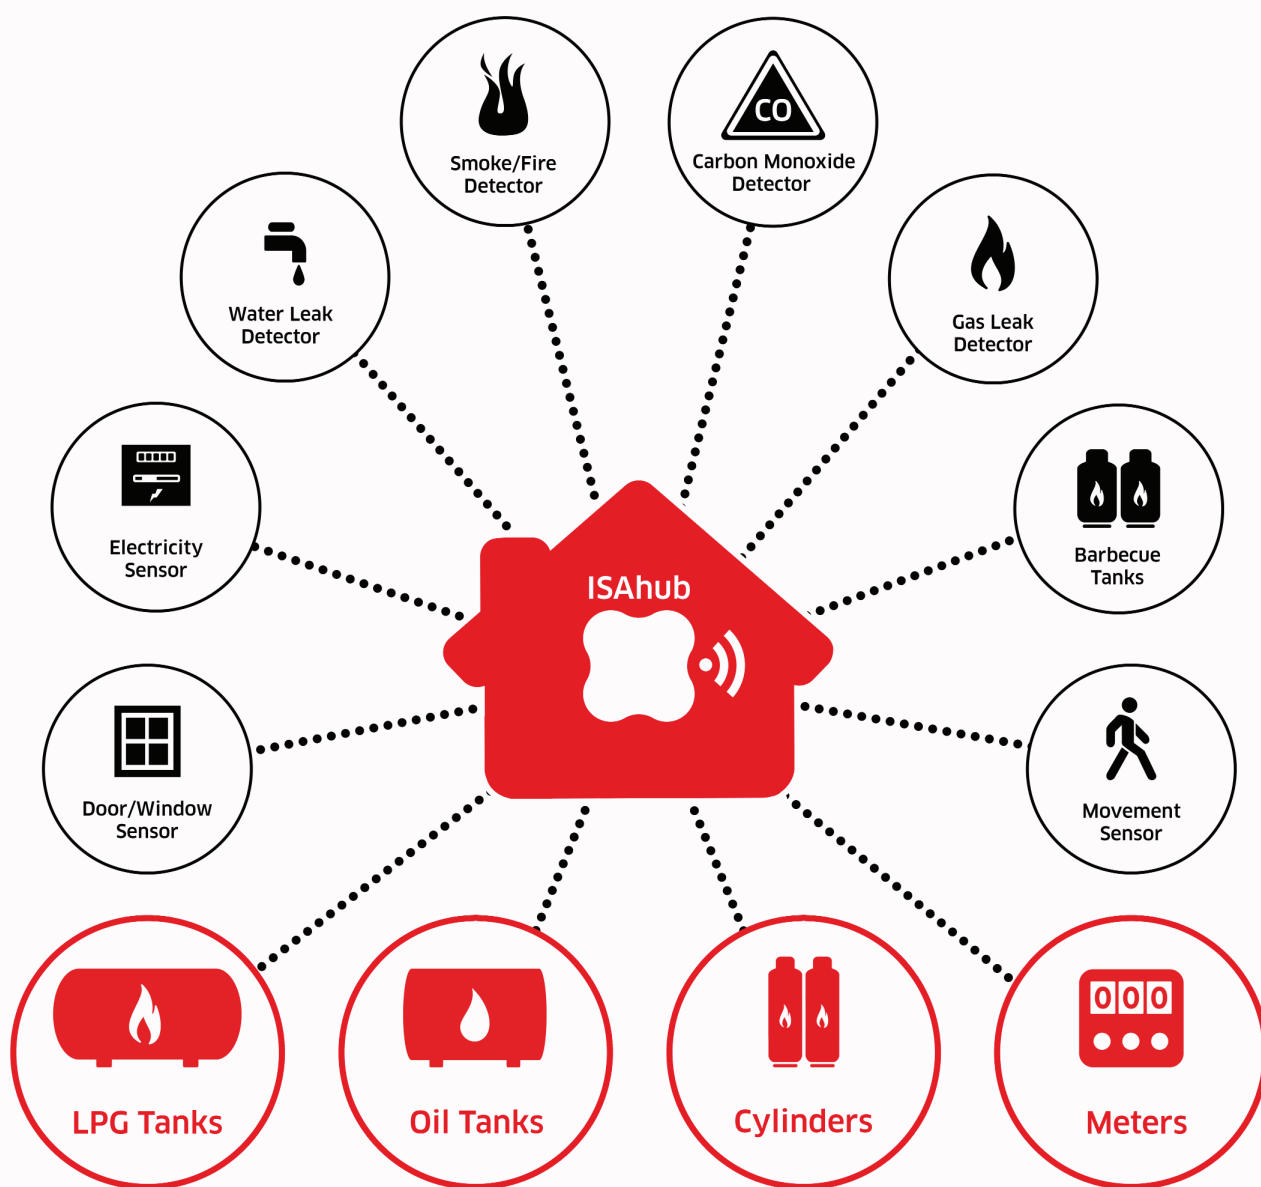

Wan Options: Ethernet, Wi-Fi

Home Area Network: ZigBee 2.4 GHz / 868 MHz Home Automation, Wireless M-Bus 868/916 MHz, Wi-Fi (b/g/n)

Power consumption: Typical: 1.2 W, max: 2.5 W

Customizations: External antenna connectors, Enclosure in custom color, Top label in custom color and design

In an increasingly competitive market, this is an opportunity
to differentiate your portfolio through our
innovative solution.
